

# Letter of Conformity

## Re: Microbial Products

To whom it may concern,

This letter confirms that the Aquarius microbial products are manufactured in accordance with Class 1 organisms by the CDC (Center for Disease Control), which are the safest known to man. Our formulations contain no pathogenic bacteria species, and no genetically altered bacteria species.

In addition, the bacteria species chosen in our formulation will not harm the indigenous bacteria found in wastewater treatment plants; however, they will compete with these indigenous bacteria for their food source (carbon, nitrogen, phosphorus, etc.), as well as for their energy (dissolved oxygen).
